Technical Services

Spectrum Software Customization Options

Spectrum Technical services provides a variety of custom programming and services to support our customers' ever-changing needs for their individual businesses. We create tailored solutions to meet each business needs while retaining the standard functionality of Spectrum. Solutions range from something straightforward as custom reports to an entire specialized module.

Benefits of Custom Programming

- Solves your business problems with a specifically designed solution.

- Maintains the integrity of the Standard functionality within Spectrum.

- Projects under Software Assurance are maintained to work as designed on the newest releases at no additional cost.

- Viewpoint stores custom programming projects under Software Assurance on site.

Customizations

» Custom reports/forms throughout all Spectrum modules (Reports, Invoices, Forms, Checks, etc.)

» Spectrum Dashboard Apps

» Custom Payroll routines

» Custom Utilities / Processes

  » Update, change or purge records

  » Automated entry/update of standard Spectrum processes

» Third Party Integration (via imports/exports)

» Employee benefits (401k, unemployment, etc.) exports for providers

» Positive Pay report specific to each bank

» Local government/industries reporting requirements

» One-time direct Data inserts

> *To find out more about these and other customization services, please contact your implementation team or submit a request on the Viewpoint Customer Portal.*
